

Institutional Controls Roundtable and Training
Tucson, Arizona
April 4, 2006
New Jersey's Institutional Control Database Experience

LIST OF KEY TERMS

Classification Exception Area (CEA) - The geographic delineation of an area where groundwater contamination has been identified and within which one or more constituent groundwater standards and designated uses are suspended (N.J.A.C. 7:9C-1.4).

Deed Notice Area (DNA) - The geographically defined area within which soil remedial cleanup guidelines for specific contaminants have been exceeded. A document, which provides notice of contamination, restrictions and controls for a specific real properties (N.J.A.C. 7:26E, Appendix E) and is attached to the deeds of the affected properties.

Sanitary Waste Landfill (SWL) - A solid waste landfill is a facility, at which solid waste is deposited on or into the land for the purpose of permanent disposal or storage for a period of time exceeding six months. A Sanitary Waste Landfill shall not except for disposal any hazardous waste.

Currently Known Extent (CKE) - Delineation of a geographic area within which private drinking water wells have been compromised by a contaminant, usually from an unknown source. Residents within a CKE may be eligible for financial assistance to offset the cost of a POET or municipal water installation.

HazSite Data - a data collection tool made available to interested parties by the Site Remediation Program (SRP) for the collection and submission of sampling data from contaminated sites in New Jersey that are under SRP management or oversight.
